**FOR IMMEDIATE RELEASE**

**EVISIONING 2.0 RELEASE PROVIDES REAL-TIME, ANYWHERE ACCESS  
TO YOUR EQUIPMENT MANAGEMENT AND MAINTENANCE**

**Clearwater FL, May 2, 2005** – eVisioning is an integrated logistics support solution that is used for equipment management and facility maintenance, and /or asset tracking. Tandel Systems announces the availability of version 2.0. This .NET framework solution, provides fully web-accessible solutions to customers in various industries. Immediately Tandel Systems has proceeded with two critical deployments for tracking high value assets, maintenance and assembly inventory, work orders, and nonconformance items.

Tandel Systems' released eVisioning 2.0 is being used as a hosted solution for the tracking of mobile range and telemetry assets production and integration activities. Additionally the capability is being deployed to support launch range asset management activities.

eVisioning is customized to meet our customer's exacting expectations and can be used throughout an organization in a single site or in multiple sites. eVisioning can be tailored to work with existing applications and infrastructure. Tandel Systems is focused on providing low-cost yet high-value and responsive integrated logistics and support system solutions.
