FOR IMMEDIATE RELEASE

**TANDEL SYSTEMS LAUNCHES THE NEW RELEASE OF
EVISIONING ASSET MANAGEMENT SOLUTION**

Businesses needing a web-based solution for asset life-cycle maintenance and management now have a new choice – eVisioning Asset Management.

Clearwater FL, August 20, 2007 – Tandel Systems, Inc. announced today that their enterprise asset management solution – eVisioning Asset Management (eVAM) has been released with many new and exciting features. This release will make it easier and more efficient to manage and maintain critical equipment and facilities.

eVAM can be used by businesses to manage and maintain their critical equipment and facilities and improve support to their customers. This includes capturing and tracking accurate asset information, storing and archiving that information, distributing that information to the right person, analyzing historical information for trends, and establishing asset maintenance and renewal plans. Tandel Systems looks forward to the challenge of upgrading and improving the availability of any company's assets, reducing asset life cycle costs, and boosting the overall performance at the airport. eVAM will allow businesses to transition from a reactive maintenance operation to a proactive asset management philosophy resulting in increased productivity and performance which will yield a quick return on investment (ROI).

eVAM is built using Microsoft .NET Technologies based on Framework 2.0. Core technologies includes Windows 2003 server, SQL Server 2005, Visual Studio .NET 2005, Windows Mobile Platform 5.0 for handheld device.

About Tandel Systems, Inc.

Tandel Systems, Inc., (Tandel) is a leading Aerospace and Defense engineering solutions company headquartered in Clearwater, Florida, with regional offices in Phoenix, Arizona.
